

Traveldoo Travel & Expense

Adoption, compliance, control
& visibility. We win when you do.

At Traveldoo, we believe in keeping things simple. Simple for you, simple for your business travellers. Our Travel & Expense platform brings together everything you need to manage your travel and expenses in a single, end-to-end system – a powerful business tool that’s as user-friendly as a consumer app.

Being an Expedia Group company, helping people travel is what we do. With responsive, forward-thinking development, we’ve combined travel know-how with expense management expertise.

The result? A great booking experience for your travellers, with on-the-go, real-time expense capture that gives you enhanced visibility and control of your travel booking and expenses. The accounts process is streamlined, and detailed reporting puts you firmly in control of this key cost area.

Business Travellers

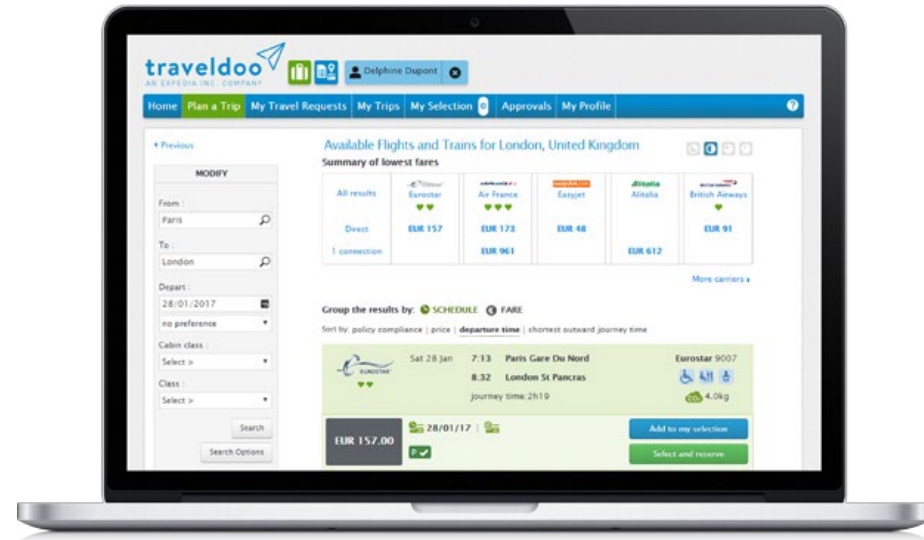

Booking business travel couldn't be simpler.

Search online and all elements of your trip – including flights, rail, car hire, hotels – are swiftly and smoothly consolidated into one itinerary. No need to search across different providers. Just select and book! Automatic approval means options that comply with your travel policy can be booked on the spot, enabling you to take advantage of the best deals. Traveldoo's

T&E solution integrates with your HR and Finance systems to gather all the relevant user data (all, of course, using the highest level of data security) – from passport number, credit card details and travel preferences to frequent flyer or travel partner programme affiliations – so you don't have to key in the details every time you make a booking.

We make expense management easy.

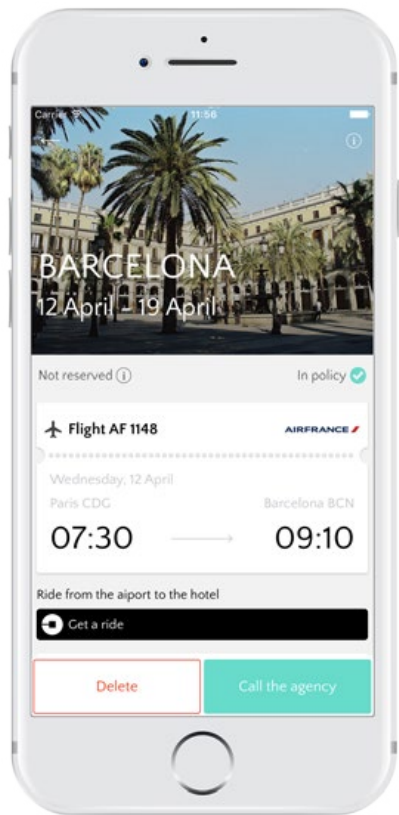

Traveldoo's Travel & Expense solution means we can make life easier, not just for your business travellers across the world, but across your business too.

The more you use it, the easier it gets!

Travel Smart

Wherever you are
in the world,
TravelDoo is right
there with you.

Wherever you are in the world, TravelDoo is right there with you. Access your itinerary (including confirmation numbers and cancellation policies) on your mobile; view maps, get directions, reserve a hotel room or book a cab.

TravelDoo's Mobile Travel & Expense app makes sure you're in the right place at the right time. TravelDoo Mobile enables users to scan receipts and compile their expense reports ready for approval and reimbursement.

Enjoy features of TravelDoo Mobile that make life on the go that little bit simpler. For example, based on your location we can predict your currency and exchange rate. TravelDoo Mobile fills out the forms so you don't have to: all the user has to do is confirm the entry.

TravelDoo's Travel & Expense solution will recognise lodge account cards and corporate credit cards, and make reconciliation of expenses quick and easy.

Business travel
just got
businesslike.

Approval and workflow tailored to your company

Whatever the size of your company, and however sophisticated your travel policies, TravelDoo can help you create a T&E solution that mirrors the way your company works. TravelDoo offers a customised solution that enables you to map your Travel & Expense system on to your existing travel policy and workflows.

By configuring the parameters for your T&E platform, you can:

- Set up automatic approval of expenses that meet your defined criteria
- Instantly approve in-policy travel, enabling you to take advantage of the best prices on offer
- Identify non-compliant purchases for specific approval by the relevant manager
- Keep travel approval agile, with mobile approval for on-the-go managers
- Encourage cost effective buying behaviour and promote preferred suppliers
- Benefit from a global overview of business trips and bookings
- Tailor menu options for different user groups

Compliance + Control = Savings

An end-to-end expense management system makes total sense for your business. With all your travel and expense data in one place, accounting and reporting become simple and responsive. Data capture using scanned receipts and electronic invoices gives you instant access to all the accounting data you need, with no need to rekey, saving you time and resource.

Traveidoo automatically aligns invoices and expenses and compiles statements and reimbursements for approval and payment. Data can be configured for VAT purposes and is easily exported to your ERP system...

all with the same user-friendly interface that makes spreadsheet accounting systems a thing of the past.

Now you can have an actionable analytic view of travel spend across your company. With over 50 report templates available and the option to customise parameters in line with specific KPIs, monitoring and reporting have never been easier.

A global view of your company's travel patterns means you can negotiate supplier discounts and enhance compliance, bringing down the high costs often associated with this area of business spend.

Take control of business travel with Traveidoo!
