

Traveldoo Travel

Your trip, your way.

Traveldoo puts business travellers in control of their travel booking. In just three clicks, travellers can enter their travel requirements, see results from different providers in a single, consolidated results page, and make their booking. With its user-friendly interface, Traveldoo's Travel solution offers a simple, easy-to-use self-booking experience.

We make self-booking straightforward

Complex bookings made simple

Traveldoo Travel makes self-booking straightforward. But sometimes the nature of the trip calls for more complex arrangements. Perhaps a traveller is planning a multi-destination trip and needs to know the best way to break the journey. Or the nature of your business might take your business travellers to less accessible destinations, with less common travel

providers, requiring bookings outside the standard supplier offering.

For more complex bookings, Traveldoo's Assisted Booking option enables users to connect with your designated travel agency and to put together an itinerary with the assistance of the travel agent's experts.

Your trip, your way

Using Traveidoo, travellers can share their requirements with your company's designated travel agent, who can then put together different proposals for the trip and pre-book them while the user makes their choice.

The user reviews the options and selects the bookings they require. The trip is then submitted for automated approval (if relevant) and the trip is confirmed. Traveidoo makes the process quick and efficient.

All bookings – whether made through Traveidoo or through an agent – are integrated into a single page, 'My Trips', enabling users to view all the different segments of their trip in a single, user-friendly format. All bookings have the same advantages as online booking, with delayed ticketing and fully refundable travel.

Agent-assisted bookings are fully integrated into the Traveidoo Travel & Expense platform, benefitting from the same streamlined workflow system and with the trip data available in our reporting offer.

All bookings are integrated into a single page 'My Trips'

Trip Sharing

Business works better when information is shared. With Traveldoo's Trip Sharing function, users can make their travel arrangements visible to colleagues, allowing them to use the arrangements made as a basis for their own. Group bookings instantly become easier and more efficient. Users can make savings for the business by sharing taxis or car journeys, at the same time reducing the environmental impact of your company's travel.

It's easy to contact colleagues to discuss the arrangements – simply click on the 'Contact' button to drop them an email. Trip Sharing makes travel more sociable, too, with users able to share tips on hotels and time-saving options, or arrange to meet up at the end of the day – after all, business travel needn't be all business!
