

VALENTINE'S DAY FOR BUSINESS TRAVELLERS

It's **Valentine's Day**, and you are away for work, a long way from your partner, with a heavy heart. Fortunately, technology can help!!

Stay in contact with your loved ones by using WiFi services. Spend time online without data roaming fees!

MY WEBSHOT has developed a mobile WiFi router which gives unlimited access to the internet in more than 120 countries, without needing any additional devices. These routers have an 8-hour battery life and are pocket-sized.

ROAMING BY ME offers a solution called Pocket WiFi, which allows you to travel and stay connected whilst on the move across 160 countries. This solution pays for itself after just 100MB of data usage outside the European Union.

Keep family & friends close thanks to bleisure, a practice which is becoming more widespread

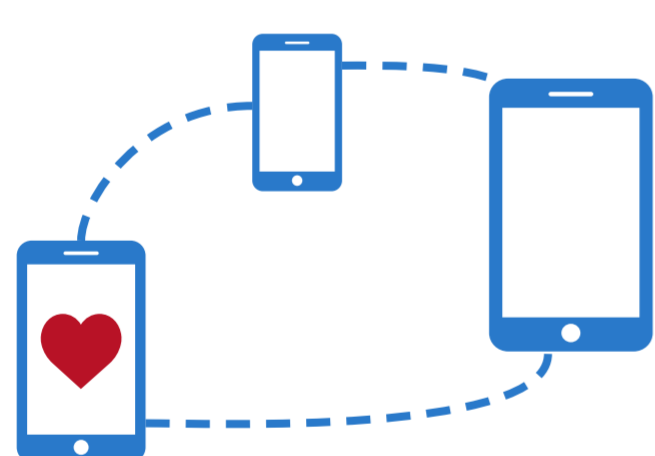

The term "**bleisure**" is a contraction of the words "**business**" and "**leisure**". It describes the growing phenomenon whereby a business trip is coupled with a leisure break in the same location.

60% of business trips using Airbnb included a Saturday or Sunday night stay as business travellers look for opportunities to link a business trip with the chance to explore a town.

Local networking (all above board)

HOTELUB, the networking app for business travellers. The app simply puts you in contact with other professionals staying in the same hotel or nearby.

DINEHERO is an app which connects people looking for company over dinner. It is a good way to develop your network of professional contacts and influencers.

Save time and don't miss your flight! Don't leave anything to chance.

CASHLESS SOLUTIONS, innovative apps to pay directly with your smartphone. Travel light! No need to take out your credit card or count your change (Apple Pay, Android Pay, Lyf Pay...).

Travel assistants **TRAVEL PLANET** deliver constant geolocation services and give the quickest routes, the duration of each leg of the journey and plans for any roadworks or slow traffic.

Don't forget to pick something up for your loved ones on your way back home: mobile assistants can make suggestions for suitable shops nearby.

The virtual assistant, **SAM**, launched by FCM Travel Solutions, is a state-of-the-art customisation service. Depending on where you are, it suggests restaurants, taxi companies, shows and sports events, all taking the traveller's tastes into account.
